PROFESSIONAL PROFILE

I help businesses build websites, custom web applications, and AI-powered automations that save time, reduce manual work, and improve operations. With 3+ years of experience in full stack development, I specialize in Laravel, PHP, React, JavaScript, WordPress, WooCommerce, API integrations, and workflow automation using Make.com, n8n, Zapier, HighLevel, and OpenAI tools.

I work closely with clients to turn ideas, business processes, and manual workflows into reliable digital solutions — from modern websites and e-commerce platforms to CRM automations, internal tools, and scalable web systems.

SERVICES & EXPERTISE

PROFESSIONAL EXPERIENCE

Full Stack Developer — *Golden Pencil*

November 2024 – Present

- Develop and maintain custom PHP and WordPress applications for client websites and internal systems.
- Build responsive, easy-to-use interfaces that improve user experience and support business goals.
- Integrate third-party tools and APIs to streamline workflows and improve efficiency.
- Troubleshoot production issues, optimize website performance, and maintain system reliability.
- Provide technical support during online and onsite client events.
- Work directly with stakeholders to deliver practical, business-focused solutions.

Full Stack Web Developer — *Inext Software*

April 2024 – September 2024

- Developed and maintained Laravel-based web applications tailored to business and client needs.
- Upgraded legacy Laravel systems to improve scalability, maintainability, and long-term usability.
- Redesigned websites to create a cleaner, more modern, and user-friendly experience.
- Built and customized WordPress websites, themes, plugins, and backend features.

- Implemented database integrations and deployment workflows for web applications.
- Translated client requirements into scalable technical solutions.

Junior Programmer — *Prestige Interactive*

August 2023 – April 2024

- Managed and updated large-scale directory databases using SQL and HeidiSQL.
 - Maintained digital mall directory systems and supported ongoing website updates.
 - Assisted with UI improvements and system enhancements.
 - Installed and configured Laravel-based applications across multiple deployments.
 - Handled map plotting and location-based data management for directory platforms.
-

SELECTED PROJECT HIGHLIGHTS

AI-Powered Lead Qualification & Follow-Up Automation

Built automation workflows that qualified, routed, and followed up with leads automatically using AI tools, CRM integrations, and no-code automation platforms.

Laravel Business Management Systems

Developed custom modules, reports, and database-driven workflows that improved internal business processes and system maintainability.

WordPress & WooCommerce Solutions

Designed and developed business websites and e-commerce platforms customized to client goals and branding requirements.

Product Scraping & Content Automation

Automated product imports, translation workflows, content generation, and inventory synchronization to reduce repetitive manual work.

Interactive Virtual Tour Solutions

Developed immersive web-based virtual tour experiences for property and facility presentations.

EDUCATION

Full Stack Web Development Bootcamp — KodeGo | 2022 – 2023

Bachelor of Science in Mechatronics Engineering — Batangas State University | 2014 – 2019
